KOBINA KYEREBOAH

Community 21, Tema | +233(0)553730959|kobinakyereboah2121@gmail.com |

PROFESSIONAL PROFILE

Computer Science graduate with hands-on experience in software development, UI/UX design, data analytics, and process automation. Experienced in building web and desktop applications, including TrustKonnect, a service-provider platform developed during an internship at HapaSpace Innovation Hub, and internal audit and production tools at Intelligent Card Production Systems (ICPS). Quick learner with strong problem-solving, teamwork, and adaptability skills, passionate aboutbuilding technology that improves business operations and user experiences

EDUCATION

KUMASI TECHNICAL UNIVERSITY — **Kumasi, Ghana**
COMPUTER TECHNOLOGY,BACHELOR OF TECHNOLOGY — Oct2021–Nov2025
Class: Second Class Upper

CHEMU SENIOR HIGH SCHOOL — **Tema, Ghana**
GENERALARTS,Courses:Electivemathematics, Geography, Economics, French. — Sep.2017–Jul. 2020

TECHNICAL SKILLS

DEVELOPMENT: HTML, CSS, JavaScript, TypeScript, PHP, FlutterFlow, Firebase, SQL, MongoDB
FRAMEWORKS & TOOLS: Next.js, Git, GitHub, Figma, Microsoft Excel, Power BI, Microsoft Office
AREAS: UI/UX Design, Data Analytics, Database Management, REST APIs, Software Testing, PSI testing, Prompt Engineering
PROFESSIONAL: Problem Solving, Team Collaboration, Communication, Leadership, Time Man

PROFESSIONAL EXPERIENCE

1. Smart Card Operator — Intelligent Card Production Systems (ICPS) — **Spintex, Accra**
(National Service Personnel) — Oct.2025 – Present.

- Operate and monitor smart card milling, embedding, serialization, and quality assurance processes.
- Developed Whitelist Analyzer, an internal desktop application for audit verification and whitelist processing.
- Developed Remaker, an internal desktop application supporting smart card remake workflows.
- Perform quality checks and inspections to maintain production accuracy and high-quality smart cards.
- Ensure production checklists are completed and support stock control within the Milling

2. Computer Science Intern — HapaSpace Innovation Hub — **Danyame, Kumasi**
May 2024 – Nov 2024

- Designed and developed TrustKonnect, a mobile web application connecting users with trusted artisans and service providers.
- Created user interfaces using Figma and FlutterFlow and worked with Firebase for backend services and data management.
- Supported data entry and digital innovation activities.
- Participated in Ghana Digital & Innovation Week and the R4DAC pilot training

3. Data Analytics Intern — Institute for Digital Marketing & Communication (IDMC). **Osu, Accra**

Oct 2023 – Nov 2023

• Analysed datasets using Microsoft Excel and Power BI.
• Performed data cleaning, transformation, statistical analysis, and visualization.
• Created interactive dashboards and reports using Power BI Desktop and DAX.
• Applied Excel formulas, functions, PivotTables, charts, and advanced data

PROJECTS

TrustKonnect — Mobile Web Application

Designed and developed a platform connecting customers with trusted artisans and service providers. Built with FlutterFlow and Firebase, with UI/UX designed in Figma.

Whitelist Analyzer — Desktop Application

Developed an internal audit tool for processing and validating whitelist data, helping streamline audit workflows.

Remaker — Desktop Application

Built an internal application to support and streamline smart card remake operations within the production environment.

Ghana Police Lost and Found — Website

Built a website for the Ghana Police as my final year project to help track lost items.

ACHIEVEMENTS

• Graduated with Second Class Upper in Bachelor of Technology, Computer Technology.
• Successfully developed TrustKonnect during an internship at HapaSpace Innovation Hub.
• Built Whitelist Analyzer and Remaker to support operational workflows at ICPS.
• Completed professional training in Data Analytics and Visualization using
